NEXI SOFTWARE

iCONNECT

Automating Information Capture For
NEXI for District Attorney Submissions

PRODUCT OVERVIEW

iConnect enables seamless integration to existing systems by Law Enforcement Agencies that are currently using NEXI. iConnect helps reduce time, cost and errors that are incurred when complaints are retyped into NEXI for electronic submission.

iConnect links to information in existing systems, centralized the data and supporting documents and allows for automatic submission to NEXI when directed.

NEXI increases efficiencies and reduces cost associated with manual submission of information.

iConnect further increases efficiencies by directly connecting to existing systems and applications and mapping information. Leveraging iConnect helps avoid:

- **Increase in Errors:** The risk of errors is increased each time information is typed into new systems.

- **Inefficient use of resources:** Departments are under more pressure than ever to reduce costs and use personnel efficiently.

- **Process Delays:** Without careful management, bottlenecks develop and slow the submission process.

WHAT IS IT?

iConnect is a software used to gather information from multiple systems and submit it to **NEXI**.

WHY USE IT?

- **Reduce Errors.** Use existing information from systems rather than retyping it for **NEXI**.

- **Save Time.** Accelerate the time in which complaints are submitted to the District Attorney's office.

- **Save Money.** Reduce the costs associated with double-entry and re-submissions, and allow for more efficient use of your resources.

WHAT TYPE OF INFORMATION?

- Record Management Systems

- Photo / Video Management Systems

- Document Management Systems

BENEFITS of iCONNECT

BENEFIT	EXAMPLE
Connects disparate systems for easy access	Centralize related content from RMS, photos from DIMM's, documents from Laser Fiche and review content for completeness.
Easily determine the state of Submissions	Clearly display submission reports to show the state of all submissions.
Fewer personnel required to submit Complaints	Time to gather information from existing systems is significantly less than re-entering all of the data. Personnel then review information for completeness and submit to the District Attorney when ready.
